- membership simplified

## Secure web based membership administration

### The Affordable Membership System Solution

Starting from as little as £2 per month the feature packed cleartarn Membership system offers exceptional capability and reliability. With comprehensive membership records it is accessible from any web based computer or mobile device. When members have chosen to attend or provide a resource for an event their emergency contact details are readily available. This solves one of the major headaches of administering any event and ensures that those left at home can be contacted whenever needed.

### Data Security is Paramount

cleartarn Membership uses 2048 bit SSL security and cleartarn undertakes never to share information stored on the membership system. Uploaded files are stored in a secure area—unlike many web based systems where the data is accessible behind a standard website. Whether used by a club, school, company or event organiser, cleartarn recognises the need for private information to remain private and for users to have full control of the emails (including automated ones) that they receive.

### Automated Email Reminders

Unlimited categories of renewals e.g. CRB checks, licenses, membership subscriptions etc. can be created and fully automated with email reminders. Event reminders, equipment collection and return prompts are available you will even be emailed to let you know that you are running out of consumable stocks.

### Equipment Management

### New equipment hire module

Many organisations effectively 'hire out' their equipment or facilities even if it is not their main business. The cleartarn Membership system simplifies this process allowing members to book equipment/facilities online. The booking system allows notes to accompany the booking itself and equipment condition photographs or instruction manuals can all be made available securely online. The module links to the email reminder system to automatically remind users to collect or return items. Equipment service periods and reminders can also be built in.

### PayPal Payments System

cleartarn Membership has PayPal links to enable users to make payments directly to your organisation using the secure PayPal payment system. Users are re-directed to the PayPal site to pay using their PayPal account or by credit/debit card. As you would expect, no credit card information is stored on the Membership system.

### Payments using PayPal

**cleartarn produces a range of standard and customised secure web based systems for businesses. Systems can be integrated with new or existing web sites to provide highly customer focused web solutions.**

May 2012

*The new cleartarn Demonstration system is free to use and is fully functioning apart from the emailing system*

### Events and Rostering System

*A new event management system has been added to the membership system. This allows members to choose to attend events and for the event organiser to identify the resources needed. The rostering of resources and the ability to duplicate events and send out reminder emails makes event management a simple task.*

cleartarn is a limited liability company registered in England No. 07520373
